

# Boreal Discovery Centre

Thompson Zoo, Manitoba, Canada

**Total Area: 8 acres**

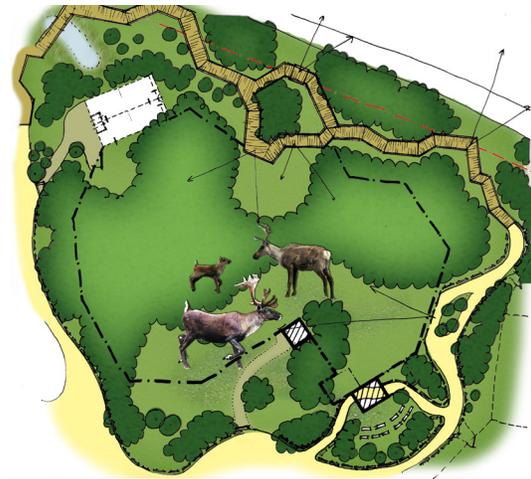

**Animal Area: 2.2 acres**

**Animal: Canadian Lynx, Woodland Caribou, Bald Eagle, Great Grey Owl**

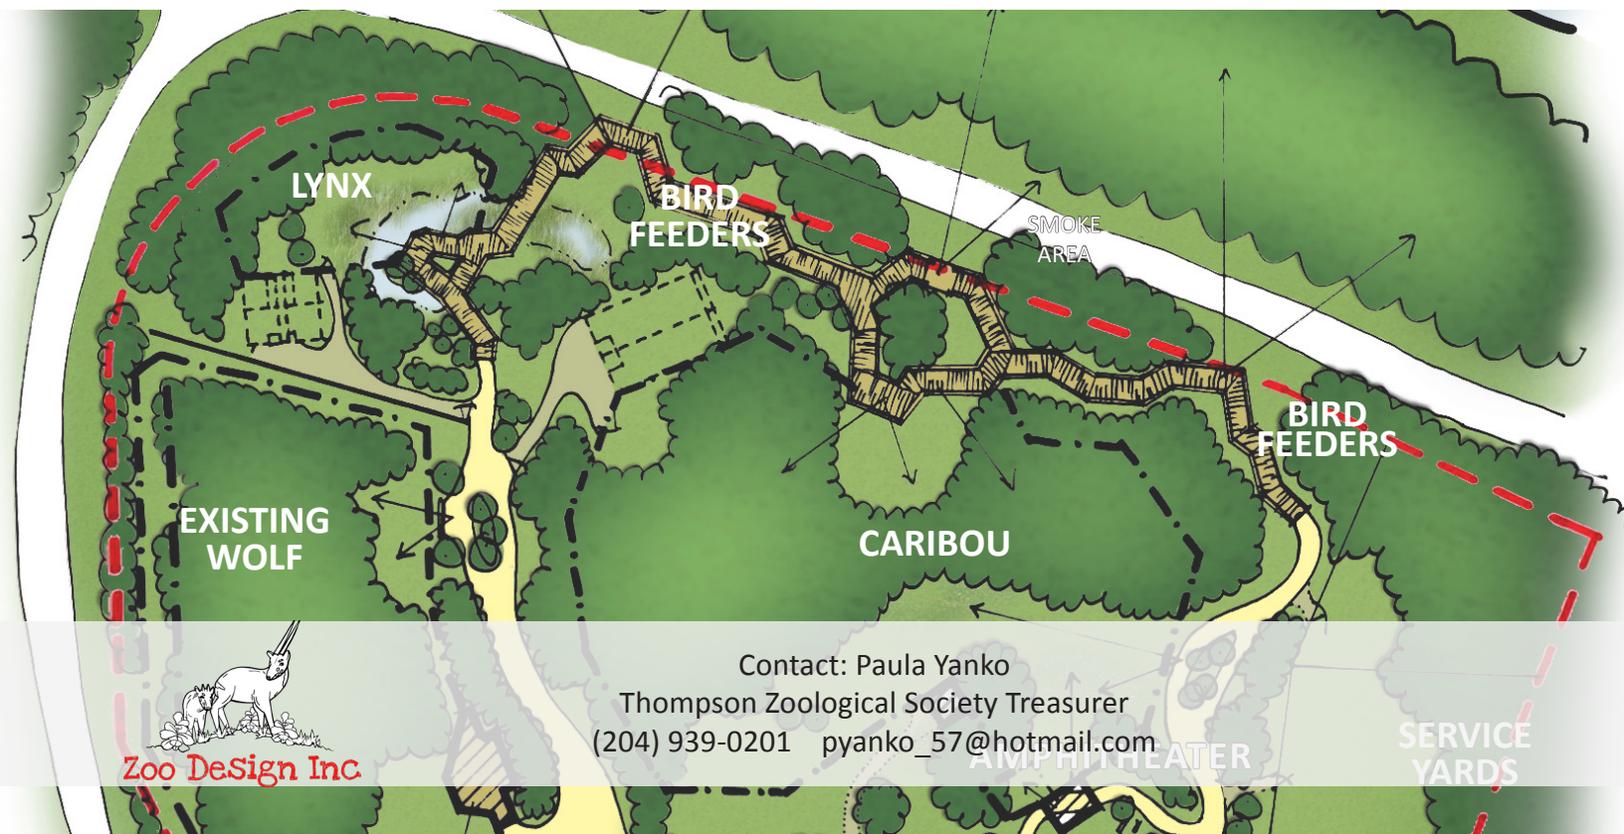

## Master Plan, Concept Study

In an effort to revitalize the Thompson Zoo to meet and exceed CAZA Standards, Zoo Design Inc collaborated with the Zoo team to develop a Master Plan for the new Boreal Discovery Center. This plan showcases the Zoo's vision for dynamic naturalistic habitats by engaging both native and resident species, as well as visitors. The design works with local ecosystems to create a seamless connection inside and outside the exhibits. An aquarium follows the lives of sturgeon, a local fish, and the rest of the site supports other local wildlife.
